Tutorial work for Tuesdays during the Autumn Term

For Year 12, the general theme is one of Health and Safety, with an added focus on ensuring students are developing time management and study skills. They will all have a library induction session as well as a debating session with Tina which is about encouraging them to be active learners.

Year 13 will focus on UCAS and Apprenticeships applications as well as safe driving, safe drinking and tolerance towards others.

There will also be time for follow up on Parents' Evenings and reports.

We have a number of speakers coming in during the term and there are DVDs and worksheets to use alongside these. I will give everyone copies but please feel free to use your own resources if you feel they would be more appropriate for your group. I have highlighted the speakers in the programme so you can see weeks where visitors are in.

There are 5 full assemblies during the term – unfortunately we cannot have the hall every other week as it is needed by Houses and Year groups. I will therefore schedule some separate Year assemblies and these will take place in the Common Room.

In the draft below, I haven't specified tutor groups but thought we could talk this through at the start of term.

Please go through the bulletin each week to ensure students understand what is going on and when possible use the news item and 'thought for the week' to stimulate discussion and debate. We will ensure that a range of local, national and international items appear which enable democratic values to be promoted through debate and discussion.

Tutorial Period – Autumn 2016

DATE (Week Beginning)	YEAR 12	YEAR 13
